O2toDerm – treatment process

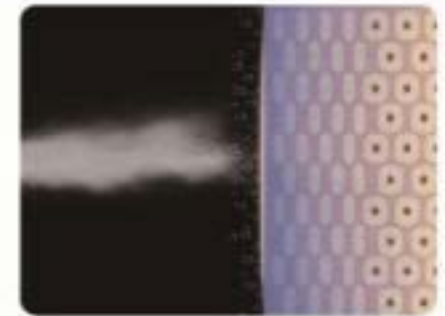

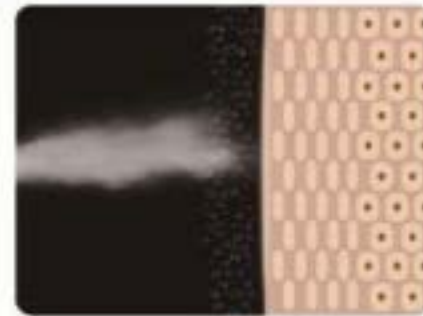

By using the 3 kinds of treatment solution for O2toDerm you can get excellent whitening and regenerating effect.

General foam

Whipping Mask

- Cleanses pores deeply, protects the moisture barrier of the skin and maintains moisture
- The whipping mask contains a weak peeling and cleansing ingredients, so be careful not to leave residues on your skin
- Mix whipping mask with water in a ratio of 1: 1

- Oxygen partial pressure induces skin respiration, spraying the ampoule into a mist and allowing better skin absorption.
- The O₂toDerm vitality ampoule is the main source of Pusan leaf extract and soothing ingredients, with excellent moisturizing and soothing effects,
- Excellent sedation after MTS procedure

- 90% High concentration oxygen and anion are supplied at the same time, promoting cell regeneration, and reducing active oxygen.
- Oxygen Energy Cream is slightly acidic and contains (+) ionic extract to help absorb an ions.
